

# Individual Quotes and SD-Forms in MS-Word

Meaningful and individually designable quotes and SD-forms

## Starting Position

Many companies lack individuality when creating their quotes. Quotes in SAP can be created only as static documents, which cannot offer much space for changes. These quotes are most of the time rigid and graphically very limited. Also, other SD-documents must be individually altered due to export requests or other special circumstances. If the user wants to have an influence on an already created SAP form, they will have a restricted access in the area of the standard supported forms technique. Additionally, small alterations within the SAP forms are usually connected with bigger ones within the SAP system. Would it not be desirable to integrate images and quotations for a better visualization? Or to re-edit texts and signatures again before sending out the respective SD-documents so that we could stay flexible?

## Individual MS-Word-Quotations from SAP by abilis

With the SAP add-on Individual MS-Word-Quotations from SAP by abilis it is possible for the companies to create their custom-designed quotations quickly and easily. The quotations stored in SAP can be converted with a click of a button into individually illustrated Word templates which can be further edited in the accustomed form. You don't have to edit your texts in a complex way in SAP, you can now do it easily in MS-Word. Printing works via the SAP standard output determination. However, you cannot print SAP standard quotations, but MS-Word forms, which you edit as you wish. Furthermore, you have the opportunity to integrate images and graphics automatically from SAP, where the materials can be more precisely describes and the quotations can be designed more clearly. The images are integrated directly from the SAP document info record. Thus, your quotations will be more transparent and clear for your clients. As for you, you will benefit from the reduced work when it comes to the re-work of the quotations. For a fast and cost-efficient implementation, we offer you Word-templates, with which you can work in a familiar way. The altered MS-Word-Quotation can be easily saved/archived in SAP after the editing with the saving function, so that you could have any time central access to any quotation in SAP.

# Individual SAP SD-Forms in MS-Word by abilis

With this SAP add-on the companies have the opportunity to create custom-designed distribution forms quickly, easily and flexibly regardless of the changes in the actual SAP forms. The documents, created in SAP, can be converted with one click into MS-Word templates and further edited in the accustomed form. Printing works through the SAP Standard output determination. However, in future you are not going to print SAP-Standard documents, but instead - MS-Word documents, which you could modify as you wish. Furthermore, you have the option to integrate images and graphics automatically from SAP. For this purpose, we offer you the following forms:

- Quotations (see our separate add-on Individual MS-Word Quotations from SAP by abilis)
- Order Confirmations
- Deliveries
- Invoices

When you save the MS-Word forms, they can be also be downloaded or archived directly in SAP, so that you can have access to the correct and reworked document any time.
