Online VAT-Number Validation

Quick and easy address data and VAT-Number validation

Starting Position

Exporting goods and services to other members of the European Union is normally VAT-exempt. A prerequisite for this is that the goods should be delivered to a company, which can provide a valid VAT-Number at the time of the supply. The companies are legally bound to verify the VAT-Number since 01.01.2010. Neglecting this requirement can lead to consequences in regard to their taxes.

Online VAT-Number Validation by abilis

With the solution Online VAT-Number Validation by abilis you can validate the address data and the VAT-Number over the web. In this verification procedure the companies receive confirmation from the Federal Central Tax Office whether a VAT-Number is valid and whether the submitted information about the company name, company location, postal code and street name correspond to the registered data in the respective EU member country.

Your Benefits

- ☑ Dimension checks of the master record in SAP is now possible

- ☑ Simple and competent verification of the address, company name (legal form), postal code and street name

- ☑ Error code indication (error codes of the Federal Central Tax Office)

- ☑ Verification of the reviews by means of logging

- ☑ Security: query of the data from the Federal Central Tax Office via secure connection (HTTPS)

- ☑ Facilitation the work of the employees with an automated verification
